

## Equitation ~

Be at one with your horse

Magnetic field treatments in equestrian sports have proven themselves for many years. Now they are possible for the rider too.

One of our users is Katharina Grupen. 2017 she took first place at the Junior European Championships. Here you can read her assessment:

”

“The Slow~Wave® device became my daily companion. Since I wear it, I feel more present, focused and stronger. Even my quality of sleep has improved. This not only strengthens me, but also the connection to my horse.”

Katharina Grupen

## Cutting-edge technology

in small format

The wellness device Slow~Wave® is a miniature pulsating magnet and frequency device in form of a pendant.

The corpus made out of wood is a timeless natural product. That means every Slow~Wave® device is very unique.

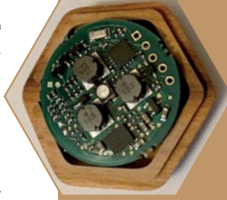

It has a battery-powered electronic, which emits magnetic fields, frequencies and light of different color spectra.

Corpus made of wood available in cherry or birch.

Technical information:

- Magnetic field quality: 3 intensities: approximately 800, 1600, 2000 µT
- Frequencies: 14 frequencies, 8Hz – 628 Hz
- Light pass through different color spectra once per minute/ duration 11 seconds
- Integrated Li-Po accumulator, 3.7V, 200mAh
- Wireless charging, Qi (WPC v1.2 Qi Industry standard) compatible
- Charging current: approximately 40mA – 5 hours charging time if the accumulator is empty
- Weight: approximately 15 g
- Measures of the corpus: approximately 35 x 35 x 12 mm (length, width, height)

## Slow~Wave® Concentration in every situation in your life

Our Slow~Wave® pendant is a wearable, pulsating magnetic field device, which addresses the body's own processes via gentle electromagnetic impulses. Thereby functions of the neurons, even various metabolic processes, can be stimulated. The oxygen saturation and the waste of the metabolism are influenced by our device. In the end that means that the Slow~Wave® is able to optimize our well-being by strengthening the immune system.

## ” WEAR & EXPERIENCE

our Slow~Wave® and as a result you could experience composure, a strengthened feeling of your body and balance.

## Slow~Wave® win strength, energy and balance in your everyday life

Our Slow~Wave® device is suitable for people, who live under pressure every day. Whether because of their work life, sport interests, school, study or other reasons. You will know your everyday life routine the best, which is precisely organized. Most of the time there is not much time to relax.

” User Melanie Wiesner is telling us: “I'm a mother of two children (11 and 3 years), I have my own business for 20 years now and work 45-55 hours per week. This often leads to the fact, that I feel stressed, annoyed and caught, as if I were living in a hamster wheel. Since I am wearing the Slow~Wave® device, I can say I'm more relaxed and active in my everyday life. In the morning I am super motivated for the day and have the feeling I got enough sleep during the night. Personally, I can say that wearing the Slow~Wave® is helping me to gain more life quality.”

## Neuromuscular support in sports ~ Endurance ~ Power ~ Regeneration

Another user of our wellness device Slow~Wave® is the Olympic champion Eric Frenzel – the most successful sportsman in the category Nordic combination of all times.

What he is telling us:

“...Within the Nordic combination we have to complete highly specific training sessions. Therefor I need explosiveness, muscle power and also an enormous muscle power for ski jumping. To be successful, the cross-country skiing requires a high endurance. My achievements are based on the results of complex training strains of the body and psyche. Sometimes I notice that my musculature is painless but doesn't have optimal resilience. Therefor I would need the help of doctors and therapists. Unfortunately, often we are missing this help in certain situations or during our trainings.

”

Therefore, I am so lucky to have a “little therapist”, which I can wear 24/7 and take it to every place I want. The Slow~Wave® provides an optimal neuromuscular support for me and is always available to me.”

Eric Frenzel

Multiple Olympic champion,  
world champion,  
World Cup winner  
in Nordic combination
